Re: Registration as a Final Stage Manufacturer

Equipment manufactured: class 7 and class 8 cab and chassis trucks and trailers.
Gross weight ranges are from 32,000 GVW-65,000 GVW.
Add oilfield body to bare cab and chassis.

Incomplete Vehicle Manufacturer supplies cab and chassis intended for completion as oilfield equipment to be used off-highway. We would be a final stage manufacturer.

We manufacture various types of mobile pumping and heating equipment that installs on truck cab and chassis provided by Kenworth, Peterbuilt, Mack, etc. The equipment is for the use in the oil industry on off-highway well sites. No changes are made to the original configuration by the chassis manufacturer.

Thank you for your attention,

Tommy Southall

President
